(54) INFORMATION DISPLAY CONTROL DEVICE AND ITS METHOD AND REMOTE INPUT DEVICE AND ITS METHOD

(57)Abstract:

PROBLEM TO BE SOLVED: To easily input a character string on a position separated from a receiving position.

SOLUTION: A remote input device 1 such as an OCR 11 collectively transmits the data of an inputted character string as a remote control signal and a set top box(STB) 5 receives the signal and decodes the signal to the original character string data. After storing the character string data, the STB 5 displays the data on a television receiver 6. Then the STB 5 accesses a terminal equipment on an interconnection network corresponding to the URL of the character string.
